

IF YOU NEED TWO BAGS IT'S NOT R-I-B

A 5% common refuge for above- and below-ground pests means...

...you need to plant two different types of seed.

A 20% common refuge for above- and below-ground pests means...

...you need to plant two different types of seed.

A 10% below-ground refuge blended with the seed **plus** a 20% single refuge for above-ground pests means...

Complex refuge system while still leaving acres unprotected. (See back.)

...you **STILL** need to plant two different types of seed.

EXAMPLES FOR CORN-GROWING AREAS

Additional Genuity® SmartStax™ Benefits on back ►

MORE Protected Acres = MORE Yield Potential

Whole-Farm Trait Activity

INSECT	Control of Pest	Protected Acres	Control of Pest	Protected Acres
European Corn Borer	•••	 95%	•	80%
Fall Armyworm	•••		•	80%
Corn Earworm (ear feeding)	••		0%	
Western Corn Rootworm Larvae	••		•	72%
Northern Corn Rootworm Larvae	••		•	72%
Western Bean Cutworm	•		•	80%
Black Cutworm	•		•	80%

Trait Mode of Action (MOA) = Control of Pest:

• = Single Activity •• = Dual-Mode Activity ••• = Triple-Mode Activity

Control/Protection

Conferred by trait modes of action

Suppression¹

Conferred by trait

¹Pioneer claims control of Corn Earworm on the Optimum® AcreMax™ 1 label; Monsanto and Dow AgroSciences data suggests suppression only. The Herculex®1 label claims suppression only.

Before opening a bag of seed, be sure to read and understand the stewardship requirements, **including applicable refuge requirements for insect resistance management**, for the biotechnology traits expressed in the seed as set forth in the Monsanto Technology Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. This product has been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product.
