

# MONSANTO GROWER LICENSING

# SEED SUPPLIER

MONSANTO

Monsanto Company is pleased to announce the adoption of the AgCelerate Stewardship Platform. Effective September 16, 2013, as a Monsanto seed supplier, you are encouraged to register with AgCelerate — and encourage your growers to register as well!

AgCelerate provides a “One Stop Shop” to **help ease both the reconciliation process and technology agreement compliance management across the seed industry.** AgCelerate is a single place for you to view, manage and assist your growers in signing technology agreements for Monsanto and other trait providers.

**IMPORTANT:** Growers with a current approved (2010 or later) MTSA are not required to sign a new agreement in order to participate in the AgCelerate Stewardship Platform. However, growers are encouraged to sign the 2014 MTSA in AgCelerate, allowing them to view the current terms and conditions and save the information electronically.

**GROWERS WITH EXISTING MONSANTO LICENSES** Growers with a current approved Monsanto Technology/Stewardship Agreement (MTSA) continue to be licensed. After you register, encourage your growers to register, update their information — and share that information with you. This will help you to better support your growers’ needs.

**NEW GROWERS** After completing the one-time registration, new growers can complete their MTSA electronically. They can then share their licensing information with you, saving both of you time!

**FLEXIBILITY** Many growers have license agreements with multiple trait providers. The AgCelerate system allows the grower to manage these multiple agreements. It also allows you, the supplier, to see at a glance whether your grower has the required agreements in place.

**AgCelerate**  
Stewarding Industry Innovation

- Provides an improved way to manage the licensing status of growers — removes stress, reduces paperwork and gives you more time to run your business.\*
- Offers access to each grower’s license status with multiple trait providers, all in one place.
- Offers better representation of each grower’s farm profile and means by which they do business, **simplifying the reconciliation process to better match farm entities with sales transactions.**

\* License status will continue to be available at [mymonsanto.com](http://mymonsanto.com) and [corn-states.com](http://corn-states.com)
